Broaden your Communication Horizons...

Motorola Metro Wi-Fi

With the growing need of instant wireless connectivity, Motorola Metro Wi-Fi gives you the ability to overcome the digital divide, improve overall productivity, streamline communication and encourage economic development.

Motorola Canopy

Motorola's Canopy system is a cost efficient solution which shortens the time providers need to deliver high-speed wireless broadband service to clients upgrading from dial-up and enables a range of in-demand network services.

Motorola MW810

The fully rugged Motorola MW810 Mobile Workstation provides reliable, cost-effective wireless connectivity and efficient computing power for mission-critical applications.

Channel Partner will supply appropriate channel Identifier logo

Motorola Point-to-Point Bridges

Motorola's PTP 600 Series Ethernet Bridges combine the speed and dependability of licensed wireless with the flexibility of the unlicensed space, while saving you the expense of applying for a license to set up your wireless networks.
